2019 *products*

Dear Partners,

We are very very happy to welcome you again to our stand at Salone del Mobile Milano. This year, we decided to highlight the breadth of our product offer and the technologies we have available, by using "contrast" as our stand theme. The explosion of colours using DUOCOLOUR technology contrasts perfectly with the natural colour and grain of wood. Many of the chairs we are presenting have an amazing, almost infinite stack-ability; check out the contemporary SPIRE or the classic ANTILLA models. The raw version of the SENDI armchair contrasts with the traditional, somewhat conservative shape of the VIENA. The inherent beauty of the natural wood takes on a completely new aesthetic when it becomes the backdrop or frame for multi-coloured, photorealistic prints, both on our chairs and tables.

The theme of this year's exhibition is "diversity". Each of our clients has very different needs, but all of them, are equally important to us. The diversity we can offer, with our extensive and innovative range of furniture and finishing, proves that we can address these diverse needs.

Meet with us. Discuss with us. Try us.

Let's inspire each other. Enjoy your time on our stand!
